

Tasker — Calm Task Management App

A full-stack task management web application built with Node.js, Express, SQLite, and vanilla JavaScript.

Features

- User Registration & Login with JWT authentication
- Create, Edit, Delete tasks
- Set task Status — To Do / In Progress / Done
- Set task Priority — Low / Medium / High
- Set Due Dates with overdue highlighting
- Search tasks by title
- Filter tasks by status and priority
- Real-time stats dashboard (total, todo, in-progress, done)
- Dark / Light mode toggle
- Responsive design (mobile friendly)
- Landing page with feature highlights

Tech Stack

Layer	Technology
Frontend	HTML, CSS, JavaScript
Backend	Node.js, Express.js
Database	SQLite (sqlite3)
Auth	JWT (jsonwebtoken)
Password	bcryptjs (hashed)

Project Structure

```
tasker-app/  
├── frontend/  
│   ├── index.html      # Main HTML (landing + auth + app)  
│   ├── style.css       # All styles + dark mode  
│   └── app.js          # Frontend logic  
└── server/  
    ├── index.js        # Express server entry point  
    ├── db.js           # SQLite database setup  
    ├── middleware.js   # JWT auth middleware  
    ├── package.json  
    └── routes/  
        ├── auth.js     # /register, /login  
        └── tasks.js    # CRUD task routes
```

Getting Started

Prerequisites

- [Node.js](#) v18 or higher

Installation & Run

```
# 1. Go to server folder  
cd tasker-app/server  
  
# 2. Install dependencies  
npm install  
  
# 3. Start the server  
node index.js
```

Open the App

Visit in your browser:

```
http://localhost:3001
```

API Endpoints

Method	Endpoint	Description	Auth
